Phase 2: Requirement Analysis

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Functional, technical and data requirements for the solution

1. Requirement Overview

This phase captures what the solution must do and the technical setup needed in ServiceNow to build it.

2. Functional Requirements

ID	Requirement	Priority
FR-01	User can order the "Standard Laptop" item from Service Catalog > Hardware	High
FR-02	Submitting the order creates a Request (REQ) and Requested Item (RITM)	High
FR-03	Approver can approve the request from the Approvers section	High
FR-04	A flow runs automatically and creates a Catalog Task (sc_task) for the RITM	High
FR-05	Catalog Task short description and description = "Laptop needs to Configured"	High
FR-06	Catalog Task is assigned to the Hardware group	High
FR-07	Catalog Task Approval field is set to Approved	Medium
FR-08	Standard Laptop catalog item uses the flow as its Process Engine	High

3. Non-Functional Requirements

- **Reliability:** the flow must run every time a Standard Laptop request is placed.
- **Usability:** no extra steps for the requester; ordering stays simple.
- **Maintainability:** low-code flow so admins can edit it without scripting.
- **Security:** flow runs as System User; only authorised roles can edit flows and catalog items.

4. Technical Requirements

Item	Details
Platform	ServiceNow instance (Personal Developer Instance or company instance)
Tools	Flow Designer (Process Automation), Service Catalog, Maintain Items
Application scope	Global
Run As	System User
Trigger	Service Catalog
Action	Create Catalog Task
Tables	sc_request, sc_req_item, sc_task

Item	Details
Roles	admin / catalog_admin / flow_designer; approver user

5. Data Requirements

Field	Value
Short description	Laptop needs to Configured
Description	Laptop needs to Configured
Assignment group	Hardware
Approval	Approved
Request Item	Requested Item record from the trigger (data pill)

6. Assumptions and Constraints

- The Hardware assignment group already exists in the instance.
- The Standard Laptop catalog item exists under the Hardware category.
- An approver (e.g. Eric Schroeder) is configured for the request.
- The flow must be Active and attached to the catalog item to run.
