Phase 6: Project Testing

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Test cases, results and summary

1. Test Objective

Verify that ordering a Standard Laptop and approving the request automatically creates a Catalog Task with the correct short description and assignment group.

2. Test Environment

Item	Details
Platform	ServiceNow instance
User	System Administrator (requester and tester)
Approver	Eric Schroeder
Catalog item	Standard Laptop (Hardware category)

3. Test Cases

ID	Test Case	Steps	Expected Result	Status
TC-01	Flow is active	Open Flow Designer, check Standard Laptop task	Status shows Active	Pass
TC-02	Flow attached to item	Maintain Items > Standard Laptop > Process Engine	Flow = Standard Laptop task	Pass
TC-03	Place order	Service Catalog > Hardware > Standard Laptop > Order Now	REQ number generated (REQ0010001)	Pass
TC-04	Approve request	REQ > Approvers > right-click > Approve	Approval state = Approved	Pass
TC-05	RITM created	REQ > Requested Items	RITM0010001 available	Pass
TC-06	Catalog task created	RITM > Catalog Tasks	SCTASK0010001 listed	Pass
TC-07	Short description	Open SCTASK0010001	Laptop needs to Configured	Pass
TC-08	Assignment group	Open SCTASK0010001	Assignment group = Hardware	Pass
TC-09	Approval field	Open SCTASK0010001	Approval = Approved	Pass

4. Negative / Additional Checks

Scenario	Expected Behaviour
Flow deactivated	No catalog task is created (activate flow to fix)
Flow removed from Process Engine tab	Order is placed but no task is generated
Request rejected by approver	Review flow behaviour; consider adding a condition in future

5. Test Summary

All core test cases passed. The flow creates SCTASK0010001 under RITM0010001 with the short description "Laptop needs to Configured" and the Hardware assignment group. Flow runs can also be checked under Flow Designer > Executions.

6. Defects Log

ID	Description	Severity	Status
-	No defects found in the tested scenario	-	Closed
